DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 2, and 5-7, drawn to diagnosis of a disease, classified in class 424, subclass 9.1+.
 - II. Claim 3, drawn to response to therapeutic agents, classified in class 435, subclass 7.1+.
 - III. Claims 4, and 20-55, drawn to screening of drugs, classified in class 436, subclass 501.
 - IV. Claims 8-19, drawn to method of generating cellular component, classified in class 359, subclass 900+.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Groups II, III, and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of diagnosing a disease of Group I is not disclosed as capable of use together with response to therapeutic agents, of Group II, or screening of drugs of Group III, or method of generating cellular component of Group IV and diagnosing a disease of Group I have different modes of operation, different functions, or different effects than response to

therapeutic agents, of Group II, or screening of drugs of Group III, or method of generating cellular component of Group IV.

3. Inventions of Groups II and III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of response to therapeutic agents, of Group II, is not disclosed as capable of use together with screening of drugs of Group III, or method of generating cellular component of Group IV and inventions of response to therapeutic agents, of Group II, have different modes of operation, different functions, or different effects than screening of drugs of Group III, or method of generating cellular component of Group IV.

4. Inventions of Groups III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of screening of drugs of Group III is not disclosed as capable of use together with method of generating cellular component of Group IV and Group III, have different modes of operation, different functions than method of generating cellular component of Group IV.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1655

6. A telephone call was made to Elizabeth Hanley on February 4, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CAR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CAR 1.48(b) and by the fee required under 37 CAR 1.17(I).
